EDUCATION

Software Engineering

Software University

11/2021 - Present Sofia, Bulgaria

- C# Programming Basics** - Introduction to programming, data types, conditionals (if-else), and loops.
- C# Programming Fundamentals** - Developed proficiency in fundamental concepts including arrays, lists, methods, associative arrays, text processing, regular expressions, and version control with Git.
- C# Advanced** - Delved deeper into C# with advanced topics like exception handling, stacks, queues, multidimensional arrays, sets, dictionaries, streams, functional programming, basic classes, and generics.
- C# OOP** - Gained expertise in object-oriented programming principles including inheritance, encapsulation, abstraction, and polymorphism. Also learned about unit testing, SOLID principles, mocking, and design patterns.
- MS SQL** - Obtained an understanding of relational databases, including writing and executing queries using SQL Server. Covered topics such as CRUD operations, functions, procedures, transactions, and triggers.
- C# Entity Framework Core** - Mastered the leading ORM library in C#, EF Core, using both Code-First and Database-First approaches to build various applications.
- HTML & CSS** - Developed skills in structuring HTML documents, utilizing various tags, and styling documents using CSS.
- JS Front-End (+JS Advanced)** - Used JavaScript for making AJAX calls, implementing functions, DOM Manipulations, and creating dynamic websites.
- C# Web** - Mastery of ASP.NET Core, building MVC and Web API applications.

Software Engineering

St. St. Cyril and Methodius

10/2023 - Present Veliko Tarnovo, Bulgaria

PROJECTS

Social Media ASP.NET Core

2024

- (Preview)** A Social Media platform built with ASP.NET Core (MVC and Web API) that replicates key features of modern social media applications.

Portfolio

2024

- (Preview)** This website's purpose is to showcase my skills and expertise as a software engineer.

Car Renting System ASP.NET Core

2023

- (Preview)** A project focused on online car rental built with ASP.NET Core MVC. It fully incorporates CRUD operations.

Weather Application

2023

- (Preview)** C# Console application developed with Windows Forms that provides real-time weather information for any city globally using the OpenWeather API.

Coding Trivia

2023

- (Preview)** This is a programming trivia website where you can test your knowledge to various programming languages. Built with HTML, CSS and JS.

TECH/SOFT SKILLS

Tech Skills

.NET

C#

EF Core

ASP.NET Core
